

# After Incident Report

## Lessons Learned, NARTC

The purpose of the After Incident Report is to identify issues that occurred on an incident and how they were resolved. The lessons learned in the report will also be used to refresh or update training curriculums. Issues and trends that are identified may have Fire Action Collection Teams assigned to them in the future for further analysis and resolution.

Incident Management Teams and Agency Administrators are asked to complete the following questionnaire for the incident(s) that they managed:

Incident Name: **Burn Canyon**

Dates of Assignment: **7/11-7/25**

Unit or Jurisdiction(s): **GMUG NF**

Geographic Area: **Rocky Mtn**

Report Submitted by: **Jim Furlong IC**

1. What was the most notable success at the incident that others may learn from?

**Documentation of compliance with Thirty-mile Hazard Abatement Plan.  
(see attached sample)**

2. What were some of the most difficult challenges faced and how were they overcome?

**Timely performance of structure protection planning and evacuation planning.**

**This was overcome on subsequent assignments by stressing its importance and assigning the responsibility to the planning OSC and 1 DIVS, both of whom are County Fire District employees. Having personnel with structure protection and evacuation planning skills on IMTs is critical.**

3. What changes, additions or deletions are recommended to various training curriculums?

**None Identified**

4. What issues were not resolved to your satisfaction and need further review? Based on what was learned, what is your recommendation for resolution?

**None Identified**

Please submit this report to the Lessons Learned Program at the National Advanced Resource Technology Center (NARTC) attention Rich Wands (rwands@fs.fed.us or Rich\_Wands@nps.gov or by Fax 520-670-6413)

Thank you for completing the report. Others can learn from your experiences.
