

Incident Name: Trinity River Management Unit Lightning Complex Heat-Related Illness (2020)

State: California

Date: 7/28/20

Incident Type: Medical or Exertion or Heat

Description of the Incident:

On the Trinity River Management Unit (TRMU) Lightning Complex on the Shasta-Trinity National Forest, an individual from a TRMU Engine Module experienced a heat-related illness (HRI) described as dehydration/minor heat exhaustion. The patient was transported via ground ambulance to a local hospital where they were treated and released. A Hospital Liaison was assigned and a local AAR was conducted.
