

Incident Name: Lofer Fire Base Camp Manager Medical Incident (2020)

State: Arizona

Date: 8/30/20

Incident Type: Medical

Description of the Incident:

A U.S. Forest Service AD working in ICP as Base Camp Manager on the Lofer Fire on Bureau of Indian Affairs (BIA) Fort Apache Agency lands awoke with abdominal pain. The patient was assessed by Forest Service EMTs and was initially diagnosed with a hernia. The patient was transported via ground ambulance to a hospital where abdominal swelling (but no hernia) was diagnosed by the physician. The patient was assigned to two days of light duty.
