

Incident Name: Arapaho-Roosevelt NF PT Medical Incident (2019)

State: Colorado

Date: 10/23/19

Incident Type: Medical Emergency

Description of the Incident:

A Firefighter had just completed physical fitness exercises and felt chest pain and pain in the left shoulder. A U.S. Forest Service EMT did an assessment and directed the Firefighter to a hospital. The Firefighter was hospitalized and diagnosed with inflammation of the sack surrounding the heart. The Firefighter was released from the hospital three days later.
